SUMMARY

The goal of the E-CHAIN project is to achieve connectivity and balance of data for the Adriatic intermodal network through the realization of the E-CHAIN platform, which is used in intermodal management of passenger port services.

The main approach of the project is:

- A new way of raising awareness among suppliers
- New opportunities for job creation through a smart mobility solution
- A new business model for building and offering travel in a wider operating environment
- A new approach to reducing the lack of information
- Creating "sea freeways" as a new approach to connecting through various transport branches
- Greater passenger flow in safer conditions
