PROJECT ACRONYM AND TITLE: Impact and Effects of External Costs and Service Quality on Transport Route Valorisation (ECSQTransRoute)

FUNDING PROGRAMME: University of Rijeka – Faculty of Maritime Studies Rijeka

PERSON RESPONSIBLE: Tanja Poletan Jugović

FINANCIAL DATA

Project total cost	Overall funding assigned to PFRI
31.570,00 KN	31.570,00 KN

SUMMARY

The content of this scientific project is focused on the analysis of the two increasingly important criteria which determine the competitiveness of transport route – external costs and service quality. According that the main goals of this project are:

- to identify and analyze the main criteria and sub-criteria of external costs and transport service quality,
- to evaluate and measure the external costs and transport service quality on the example of the specific transport route - corridor and existing alternative routes - corridors,
- to analyze the research results.

The theoretical usefulness of the research relates to the evaluation methodology and the conceptual model for analyzing the impact and effects of external costs and the transport service quality on transport route competitiveness. The applicability of the research implies the possibilities of applying and using the proposed methodology in planning the valorization of any transport route or corridor.
